### Product Description

## HAIR WAVING MACHINE

- **BEAUTIFUL WAVES IN A FEW A MOMENT** - a high-quality hair wave maker is a device that allows you to prepare your own hairstyle like from a hairdressing salon . Temperature regulation from 80 to 210 degrees allows you to adjust the heating power to the needs of the hair and its condition. The lower temperature is recommended for thin and damaged hair, while the higher temperature is suitable for thicker and curly hair.
- **FAST HEATING FUNCTION** - the wave curler has a quick heating function, which will be useful in times when we have little time to prepare for going out and every moment is valuable. All you need to do is connect the inverter to electricity, and it will be ready to work in no time.
- **UP TO THREE ROLLS** - the combination of 3 rollers with a diameter of 22 mm at the same time makes the hairstyle can be prepared in a very short time. Just insert a lock of hair into the heating surface and it will quickly get the desired twist.
- **LCD DISPLAY + BAG / CASE** - The inverter has an LCD display with a temperature indicator, thanks to which we can precisely set the heating temperature. In addition, we

attach a protective case that will protect the inverter, e.g. while traveling.
