Product Description

The **Froika Hyaluronic Silktouch Tinted 50+**, designed with the new 3rd generation elastomer technology, offers primary, broad range UVA & UVB sun protection, and on a secondary level antioxidant protection thanks to the beneficial effect of the Indanone component. Combined with Hyaluronic Acid provide anti-wrinkle properties as lines and signs of acne. Provide effective coverage of skin imperfections as acne or lack of color uniformity. Its non-oily texture that is easily absorbed makes this product ideal for daily moisturizing, care and cleanliness of the skin leaving a silky matte effect. It is a photostable – water resistant & Parabens free product. **INDICATIONS:**

- Sensitive, allergy prone and reactive skins
- Oily skin prone to acne
- Photo deteriorating dermatitis (melasma, herpes, rosacea, vitiligo, lupus erythematosus etc.)
- Idiopathic photodermatitis (polymorphous sun rash)
- Chloasma (“pregnancy mask”)

PROPERTIES:

- Provides broad spectrum and equivalent protection from UVA & UVB radiation.

- Protects against the immediate (sunburn) and long-term (photoaging, photo immunosuppression, photosensitive reactions) harmful effects of exposure to solar radiation.
- Enhances the natural defenses of cells and stem cells against UV sun radiation.
- Protects DNA
- Provides anti-aging action
- Anti-wrinkle action – wrinkles, skin imperfections and signs of acne become less visible.
- Excellent non-greasy cosmetic texture
- Leaves the skin looking silky and matte
- Photostable synthesis – Water and perspiration resistant

Indanone

Innovative molecule, reduces skin stress caused by sun exposure and protects the skin from long term, harmful effects.

Hyaluronic acid of biotechnological origin

Provides intense and long lasting hydration while at the same time enhancing cell proliferation and tissue regeneration, helping to heal damage to the skin caused by exposure to the sun (erythema, inflammation, irritation).

Vitamin E

Protects from the harmful effects of “free radicals”

Photostable sun protection filters

UVA & UVB with longer lasting action

A combination of the latest Ethyl ferulate and Carnosid. Studies have shown that they protect stem cells and DNA
