Product Description

CHROMAPLEX Bond Sealer is a protective, nurturing treatment cream that stabilizes the strengthened bonds formed in STEP 1. Applied after the colouring/chemical/treatment process to maximise hair strength, Bond Sealer helps seal the hair shaft for smoother, sleeker, more vibrant colour results. **HOW TO USE:** Comb through a small amount of CHROMAPLEX Bond Sealer from roots to tips (more can be added for thicker, longer or more damaged hair). Allow to process for a minimum of 10 minutes. Hair can be cut during this time. Rinse thoroughly, then style as normal. SIZE: 500ml
